

## 01 Health and safety procedures

### 01.6 Short trips, outings and excursions

#### Planning and preparation

- Outings have a purpose with specific learning and development outcomes.
- If staff are 'borrowed' from another area to maintain ratios on an outing they are fully briefed about the children they are accompanying.
- The excursion does not go ahead if concerns are raised about its viability at any point.
- Staff check that consent forms on children's registration were signed.
- A minimum of two staff accompany children on outings. There is a ratio of 1:3 for babies in buggies, some disabled children, and children up to 2 years. Children aged 2 years have a ratio of 1:4 and children aged 3 or 4 have a ratio of 1:8, depending on the risk assessment.
- Children are specifically allocated to each member of staff/volunteer; they are responsible for supervising their designated children for the duration of the excursion.
- Parents on outings are responsible for their own children only.
- Parents who have undergone vetting as volunteers may be included in the ratio.
- A mobile phone belonging to the setting, and small first aid kit is taken out.
- Staff make sure they have water, plastic cups, spare nappies/change of clothes and wet wipes for the children going out appropriate to the length of time they are out for.
- Sun cream is applied as needed and children are clothed appropriately
- Children wear 'high viz' vests and children under 3 have a wrist strap that is held by a staff member when walking to a destination. Buggies are used for non walking children or children with SEND who require it.
- If a child has a toileting problem/accident and no facilities are available, staff clean up the child to the best of their ability without causing the child to be exposed in public and return to nursery at the earliest possible point. We do not conduct full intimate care out in public unless absolutely necessary for the child's wellbeing
- Staff have emergency contacts available on Family via mobile phone or 4G device, copy of the missing child policy and medication and equipment needed for children.
- At least 2 two way radios are taken on a trip and they are tested before leaving the premises and again when arriving at the premises
- head counts are conducted as follows - on leaving nursery, on arrival at destination, half way through the trip, when leaving the destination and on arrival back at nursery. These are conducted on Family

#### Risk assessment

- Trip form which includes a risk assessment is completed prior to the outing and signed off by the setting manager or Room leader. Existing risk assessments are reviewed/amended as required.
- Children with specific needs have a separate risk assessment if necessary.

### **Outing venue (larger outings)**

- Venues used regularly are 'risk assessed' and an initial pre-visit is made to look at the health and safety aspects. If pre-visits cannot be made, risk assessment is achieved by calling the venue and asking for their risk assessment.

### **Transport**

- If coach hire is required for an outing, only reputable companies are used.
- The setting manager ensures that seat belts are provided on the coach and that booster seats and child safety seats are used as appropriate to the age of the children.
- The maximum seating capacity of the coach or minibus is not exceeded.
- Contracted drivers are not counted in ratios.

- 

#### **Where transport is provided by the setting**

- Records are kept including insurance details and a list of named drivers.
- Drivers using their own transport should have adequate insurance cover.

### **Forest School and Beach School sessions (not on site)**

- A separate risk assessment is conducted, and Forest/Beach School standard procedures are followed.

- 

### **Farm and zoo visits**

Staff are aware of the risks posed by infections such as E.coli being contracted from animals. They are also aware of toxic substances used on farms that could be hazardous to health. Staff are vigilant of the natural dangers presented by a farm or zoo visit and conduct a risk assessment prior to the visit.

- The venue is contacted in advance of the visit to ensure no recent outbreaks of E.coli or other infections. If there has been an outbreak the visit will be reviewed and may be postponed.
- Hands are washed and dried thoroughly after touching an animal.
- Nothing is consumed whilst going round the farm. Food is eaten away from animals, after thoroughly washing hands.
- Children are prevented from putting their faces against animals or hands in their own mouths.
- If animal droppings are touched, hands are washed and dried immediately.
- Shoes are cleaned and hands washed thoroughly as soon as possible on departure.

- Staff or volunteers who are or may be pregnant, should avoid contact with pregnant ewes and may want to consult their own GP before the visit.
- Farmers have a responsibility to ensure that hand washing and drying facilities are available and are suitably located, that picnic areas are separate and clean, and that all other health and safety laws are fully observed.

For further guidance, refer to the insurance provider.

### **Larger outings checklist**

There is an identified lead person for the outing.

- The outing has an educational purpose and has been agreed with the setting manager.
- Trip form with risk assessment completed/updated and shared with every staff, student/volunteer accompanying the children.
- Staff understand the potential risks when they are out with children and takes all reasonable measures to remove minimise risks.
- The designated lead educator is the last to leave the venue, or transport being used.
- The designated lead conducts a 'safety sweep' before during and after the outing.
